Cubicle system NOXX GL in Traffic white 9317

Cubicle system NOXX GL at the Kemmler Baustoffe und Fliesen store, Böblingen

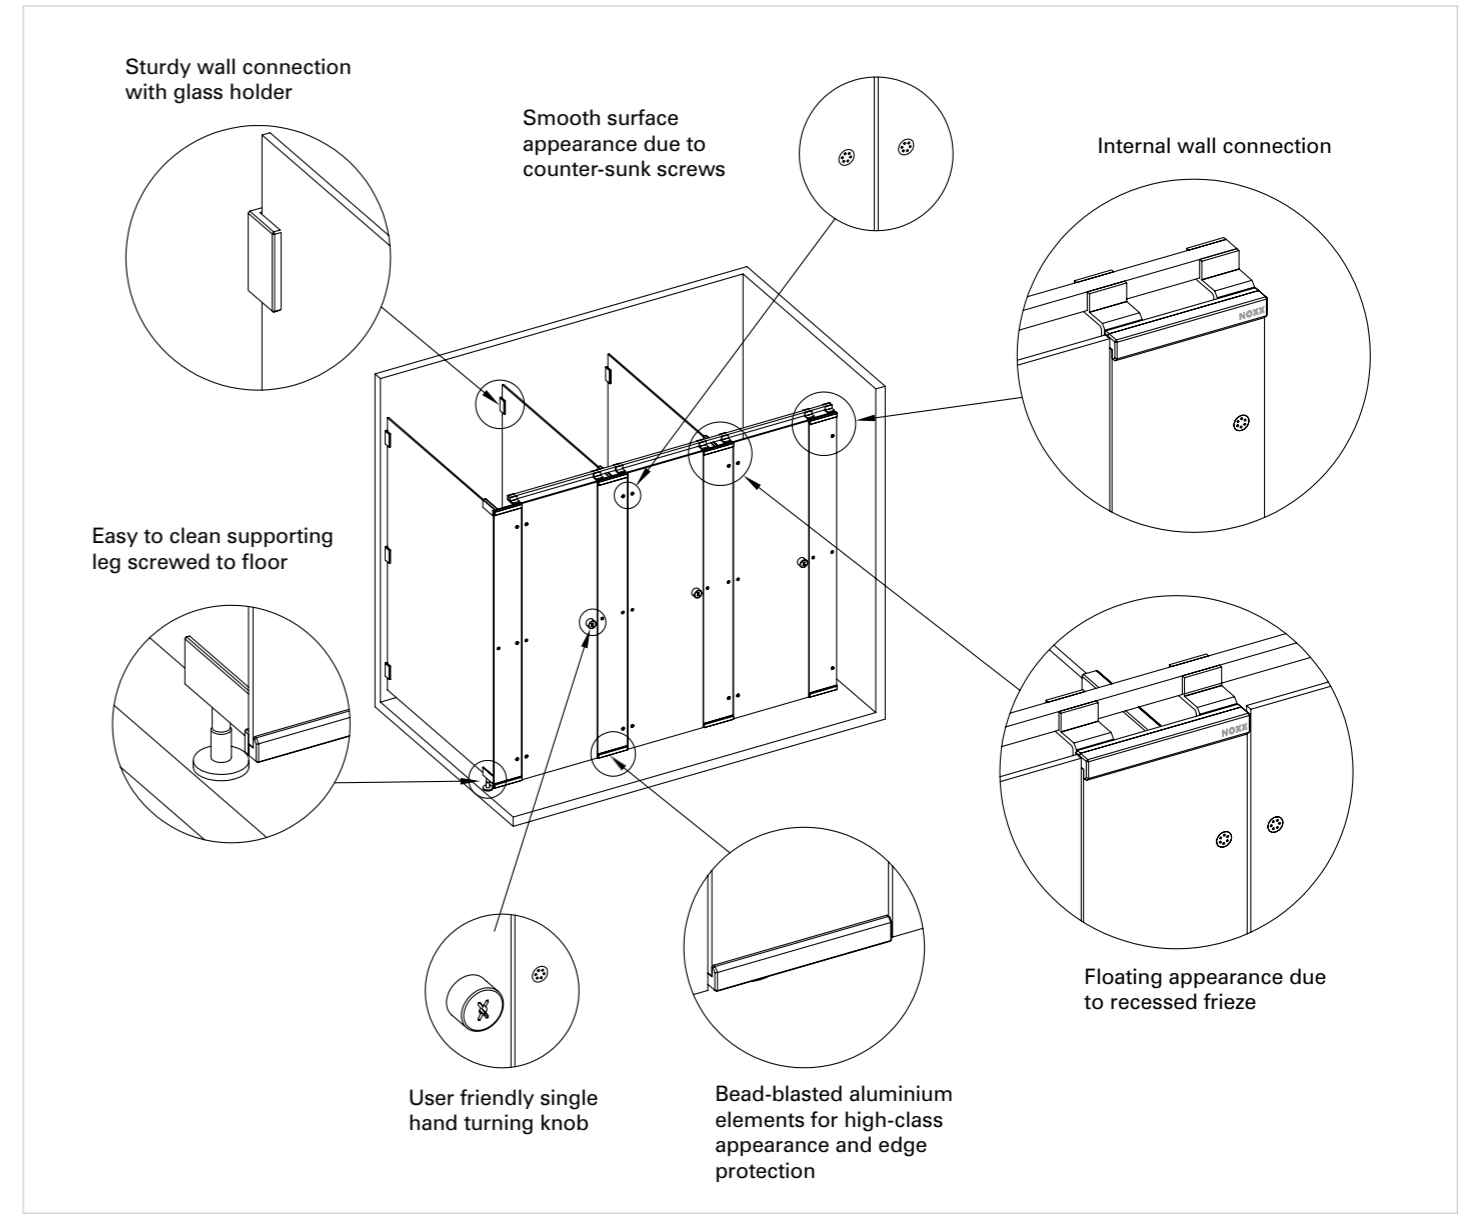

NOXX GL Cubicle system

NOXX GL is the premium cubicle system by KEMMLIT: NOXX GL glass elements are made of colour enamelled toughened safety glass (TSG). The panel thickness of the TSG is 10 mm and is highly sturdy, scratch-, as well as chemical-proof. Cutting or drilling is not possible.

NOXX GL can be easily cleaned. The non-porous surface is non-sensitive to dirt and bacteria. The "floating" construction also allows for easy cleaning of the floor. The colours are light resistant and withstand ultraviolet rays. Enamelled real-glass withstands high temperatures. This reduces the danger

in case of fire. All connection elements are made of noble aluminium, satin anodised, bead-blasted and corrosion resistant. Partition and side panels can either be realised in glass, solid grade laminate HPL or a combination of both materials. Therefore can react to individual conditions on site.

The well-balanced proportions, the smooth fronts with the heightened sense of privacy, the reduction of visible joints as well as the recessed supporting legs and frieze amplify the elegant character of the partition wall and let NOXX GL "float"!

NOXX GL Details

Great design impacts at first glance – and wins at the second. During the development of NOXX GL high value was set to continuous design.

Starting with the overall line, down to the details such as the NOXX indicator, the screw connections, the door hinges and the aluminium profiles.

The cubicle system NOXX GL has received several design awards, such as the if product design award and the reddot design award 2016.

T-connection system:

Thanks to this unique system a force fit interconnection between the pillarsters and partitions is created. This allows for a construction with a reduced number of supporting legs. With the legs hidden in the partition, the legs are made entirely out of stainless steel or aluminium with a solid cover sleeve – steplessly adjustable in height.

Hinges:

Three roller edge hinges developed by KEMMLIT made of aluminium with maintenance-free plain bearing bush and 8 mm stainless steel pin provide reliable functioning. The hinge includes a spring for self-closing of the doors.

Doors:

The doors are flush closing. NOXX GL features a single hand turning knob. All doors are characterised by the distinct NOXX indicator (red/silver) with emergency opening.

Cubicle system NOXX smart in cappuccino 1117

NOXX smart cubicle system

The new cubicle NOXX smart is the clever solution made of glass, which convinces not only with its modern visual impact but also with its elaborate features. Door and panel elements consist of 10 mm thick toughened safety glass. NOXX smart can be delivered notably fast.

All construction details are designed for high-class appearance, stability and years of maintenance-free functioning. Therefore a sturdy 3-roller edge hinge with stainless steel axis has been specially developed for NOXX smart. A soft, quiet and safe closing of the door is assured by the new and innovative softclose function.

The supporting legs are made of high quality aluminium with flat aluminium cover sleeve. The user-friendly single hand turning knob also consists of high quality aluminium. There are 11 modern and fresh colours within the standard colour range of NOXX smart. RAL colours are available after prior sampling.

Modesty screens made of glass

NOXX Complementary products

Modesty screens are being included more and more into washroom or WC areas. Next to hygiene, privacy plays a large role. With our extensive accessories made from stainless steel or

aluminium the NOXX cubicle system can be outfitted completely. Using theft proof screw connection as well as harmonising in colour and design.

Locker systems with glass doors and glass cladding

NOXX Locker systems

Suitable for the NOXX cubicle systems there are also high-class locker systems. KEMMLIT locker systems are a perfect combination of high-quality and well proven material, which are matched according to room design and area of application.

Due to the solid carcass, stainless steel hinges and sturdy doors burglary resistance is ensured. The interior fittings can be individually realized.

NOXX GL Colour concept

The KEMMLIT NOXX GL colour concept contains both **classic and modern colours**. For a successful **comfortable ambience**, you may compile an individual cubicle system, according to your own requirements.

KLASSIK | Panels and doors:

Traffic white **9317**
similar to RAL 9016

Light grey **7208**
similar to RAL 7035

White green **6504**
similar to RAL 6019

ELEGANT | Panels and doors:

Dark blue **5603**
similar to RAL 5008

Dark red **3603**
similar to NCS S 5040-R

Anthracite **7603**
similar to NCS S 5502-Y

TREND | Panels and doors:

Light blue **5203**
similar to RAL 6034

Red **3117**
similar to RAL 3013

Pale red **3303**
similar to RAL 2012

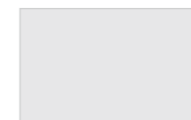

Light yellow **1403**
similar to NCS S 0560-Y10R

White yellow **1503**
similar to NCS S 1020-Y

Profiles, hinges, furniture, supporting legs and accessories:

Satin anodised **08**
similar to E6/EV1
